GEOMETRY

Represent three-dimensional figures using nets made up of rectangles and triangles, and use the nets to find the surface area of these figures. Apply these techniques in the context of solving real-world and mathematical problems.

6.G.4

1 Name the solid figure that is represented by the net below. Then find its surface area.

Name of solid: _____

Surface Area: _____

2 Name the solid figure that is represented by the net below. Then find its surface area.

Name of solid: _____

Surface Area: _____

3 Name the solid figure that is represented by the net below. Then find its surface area.

Name of solid: _____

Surface Area: _____
