

Lab task

(21-22 feb 2022)

Task 1

1

Create a tuple

2

Find the size of a
Tuple

3

Compare it with the
size of list having
exactly same
elements

Task 2

Create a tuple of number as its elements

Write a code to display sum of all the elements of this tuple

If the sum is even display “the sum is even”

If the sum is odd display “the sum is odd”

Task 3

Create a tuple

Count the elements of tuple

Using for loop display all elements of tuple

Now display only even index tuple elements

Make a list containing all odd indexed tuple elements
