CIRCULATION 4. FEVER (CHILL) 5. HEAT & FEVER IN GENERAL 6. SWEAT 7. COMPOUND FEVER

- CHILL

- I RUBRIC – COLDNESS in general
- TIME as general rubric
- Time modality given first in COUGH, EXPECTORATION, GENERALITIES
- Chapters starting with 'in general'
 - VERTIGO, CHILL, FEVER, PERSPIRATION

- FEVER

- Starting with heat in general, types of fever – CATARRHAL, CEREBROSPINAL FEVER , REMITTANT etc
- All pathological fevers except QUARTAN, QUOTIDIAN, PERNICIOUS, TERTIAN (in chill chapter)

- PERSPIRATION

- Color, odor, quantity, nature
- Absence of perspiration – Skin, dry, inability to perspire
- Starting with perspiration in general

- Chilliness beginning in **epigastric fossa**
 - Chill Beginning, **scorbicularis cordis.**
- Chill occupy earlier everyday
 - Chill, Anticipating
- Drinking make HA & all other
 - Chill, Drinking symptom unbearable
- Chilly, refractory & clumsy children
 - **Mind**, Obstinate children

- **Fever** due to getting wet in rain
 - **Chill**, Exposure, rains during
- **Fever**, becoming wet after
 - Chill, Exposure, wet from becoming
 - Chill, Water, wet getting
- **Feels better before chill**
 - Generalities, Chill

- Feel so chilly with sensation as if hair were standing
 - Chill Forenoon ; Chilliness; Shaking hair
 - Skin, goose flesh sudden chill
- Heat then chill then sweat
 - Fever, Succession heat followed by

- CATARRHAL fever
- CEREBROSPINAL fever
- **CONTINUED fever, Typhus, Typhoid**
- CONTINUED fever – exanthemic
 - = eruptive (chickenpox, small pox)
- EXANTHEMATIC fever, MEASLES
 - SKIN, eruptions, Measles
- EXANTHEMATOUS fever, SCARLATINA
- GASTRIC FEVER
- HECTIC FEVER
 - Occurring in connection with diseases of long standing duration like TB
- INFLAMMATORY FEVER
 - EG: Rheumatic Fever
- INSIDIOUS FEVER
 - Slow onset

- INTERMITTENT CHRONIC
 - MALARIA
 - spleen; with enlarged
 - SPLEENOMEGALY IN MALARIA
- IRRITATIVE fever
- PUERPERAL FEVER
- REMITTENT
 - = temperature varies during every 24 hrs, but never touches the normal
- SEPTIC
- YELLOW FEVER
- ZYMOTIC
 - = INFECTIOUS FEVER, VIRAL FEVER

- CHANGING, paroxysms - abuse of; after homeopathic potencies: sep
- Drug fail to act due to excessive medication
 - Gen, Irritability, when too much.
- Absent perspiration
 - Skin, Dry, inability to perspire
 - Fever, Perspiration absent.
- Coughing increases the fever
 - Fever, Coughing
- Feel sleepy during fever
 - Sleep. Sleepiness heat during the

- PAROXYSMS increasing in severity – irregular - long chill, little heat, no thirst
 - PULS.
- PAROXYSMS increasing in severity – irregular - short chill, long heat, no thirst
 - IP.

- Perspiration , **COLLIQUATIVE**
 - = PROFUSE IN FLOW, LIQUIFACTION OF TISSUES
- Sweat all over except head
 - Persp, Head
- Sweat whole body except face
 - PERSPIRATION - FACE,of the whole body except the
- Sweat **with loquacity**
 - Mind, Loquacity perspiration during
- Sweat **with palpitation**
 - Chest, Palpitation perspiration during

- Perspiration <
 - Gen. Perspiration
 - PERSPIRATION - SYMPTOMS agg.while sweating
- Coldness if head with perspiration
 - Head. Coldness perspiration with
- **Inability to perspire** during exercise
 - **Skin, Dry**

- PROFUSE - sitting quietly, while
 - **Kali-bi.**
- PROFUSE - uncovered parts, except the head; on
 - *Thuj.*
- PROFUSE - urination and diarrhea;
Copious - *Acon.*

FEVER

- Arrangement of rubrics – Not alphabetical

ORIGINAL TPB

- 7 subsections

- 1) Circulation of blood
- 2) Cold stage
- 3) Coldness
- 4) Heat
- 5) Perspiration
- 6) Compound fever
- 7) Concomitant complaints

ALLEN'S EDITION

- Subheadings removed
- General outline followed
- Fever as main heading & others as rubrics

- 1) (Blood &) Circulation
- 2) **Chilliness**
- 3) **Heat**
- 4) **Coldness in general**
- 5) Sweat
- 6) Compound fever
- 7) Concomitant s/m
- 8) **Febrile s/m - sides**

- From the page 250 to 252 the top heading is circulation, from page 253 it is changed to Fever.
- Though Circulation is given as a separate chapter it is included under the Fever Chapter.
- The old Edition contain these seven sub- sections.

1. BLOOD & CIRCULATION

- conditions of the blood, objective & subjective s/m of blood vessels (**anaemia, congestion**) pulse symptoms etc.
- **Blood, Anaemia**
- **Blood vessels**
 - inflammation
 - Varicose
- **Pulse, abnormal**
 - Intermittent
 - Irregular
 - More rapid than the beat of heart
 - Slower than the beat of heart

2. CHILLINESS

- Modification of chilliness
- One sided
- With thirst
- s/m during chill (concomitant)

3. HEAT

- Heat with thirst
- with inclination to uncover
 - with dread of uncovering
 - Associated symptoms (concomitants)

4. COLDNESS

- shivering

5. SWEAT

- Sweat on one side
- **Bloody**
 - **Skin, blood sweating**
- Exhausting
- Odorous
- Sweat with associated Symptoms (concomitants)

6. COMPOUND FEVERS

- different stages of fever with variations in the onset
- Chill then heat; Heat then chill
- Chill internally and heat externally
- Heat alternating with sweat

7. CONCOMITANTS OF FEVER

- Before fever
- During fever
- After fever

8. FEBRILE SYMPTOMS

- Left side
- Right side

BBCR : FEVER

- Fever totality is the unique contribution of Boger
- **Self contained repertory in a large repertory**
- Arrangement is self explanatory with many subrubrics
- Concomitant in relation to chill, heat, sweat under different headings are really valuable at bedside practice
- Each stage of fever is followed by Time, Aggravation, Amelioration and concomitants
- Help to repertorize any simple as well as complicated cases of fever
- They should be arranged properly in order to get similimum with the help of Bogers repertory

TPB: FEVER

- 1) (Blood &) Circulation
- 2) Chilliness
- 3) Heat
- 4) Coldness in general
- 5) Sweat
- 6) Compound fever
- 7) Concomitant s/m
- 8) Febrile s/m - sides

BBCR : FEVER

1. FEVER – PATHOLOGICAL TYPES
2. BLOOD
3. CIRCULATION
4. FEVER (CHILL)
5. HEAT & FEVER IN GENERAL
6. SWEAT
7. COMPOUND FEVER

1. FEVER – PATHOLOGICAL TYPES

- **Adynamic**
 - malignant putrid fever accompanied by great muscular debility (asthenic fever)
- **Bilious Fever**
 - gastric catarrh accompanied by great accumulation of bile)
- **Catarrhal Fever**
- **Gastric Fever**
 - fever attended with prominent gastric symptoms; name applied to certain forms of typhoid fever; catarrhal inflammation of the stomach attended with fever.
- **Hectic Fever**
 - fever that recurs each day, with profound sweating, chills, and facial flushing
- **Infectious, grippal, exanthematous typhus**
- **Inflammatory**

- Intermittent And **Periodicity**
 - **Quotidian**
 - **Double**
 - **Tertian**
 - **quartan**
- Milk (lactation)Fever
- Puerperal Fever
- Putrid Fever, Quinine Fever, Rheumatic Fever
- Scarlet Fever
- Septic Fever ,Small Pox
- Sudoral Fever, **Febris Helodes**
- Thermic Fever ,Traumatic Fever, Typhoid Fever Typhus Fever ,Worm Fever, Yellow Fever

- **BLOOD**

- Types of blood

- **CIRCULATION**

- Complaints of blood vessels
 - Hard, inflammed, varicose

- ❖ **CONGESTION**

- anaemia, plethora, ebullitions

- ❖ **PALPITATION**

- causes

- ❖ **HEART BEAT**

- ❖ **PULSE**

- Slower than the beat of heart = AF

TPB: BLOOD & CIRCULATION

- **Blood, Anaemia**
- **Blood vessels**
 - inflammation
 - Varicose
- **Pulse**

- **FEVER (CHILL)**

- ❖ **Chill**

- Chill, chilliness, desc, asc, shaking (**AGUE**)

- ❖ **Partial chill**

- Only in some parts of body

- ❖ **Coldness**

- Objective feeling

- ❖ **Partial coldness**

- ❖ **Sense of partial coldness**

- ❖ **Shivering , shuddering**

- ❖ **Concomitants** - Contains s/m in each & every part of the body in detail from mind to sleep divided into symp./ rubrics

- **HEAT & FEVER IN GENERAL**

- Burning, flushes of heat, sense of internal heat with external coldness

- ❖ **Partial heat**

- Heat in some parts / beginning in some parts

- **SWEAT**

- Character of sweat, color, odor, staining

- ❖ **Partial sweat**

- **COMPOUND FEVER**

- Stages of fever mixed

- Order of appearance are not in natural order as chill, heat, sweat

- ❖ beginning with CHILL

- ❖ beginning with SHIVERING

- ❖ beginning with HEAT

- ❖ beginning with SWEAT

FEVER TOTALITY

- **CHILL**

- Type - partial chill, coldness, partial shivering
- Time
- Aggravation
- Amelioration
- Concomitant

- **HEAT**

- Type/partial
- Time
- Aggravation
- Amelioration
- Concomitant

- **SWEAT**

- Type/partial
- Time
- Aggravation
- Amelioration
- Concomitant

- **Pathological types** of fever mentioned in the repertory can be used for reference and final selection of the drug
- More importance should be given to the reportorial result which is obtained by following the above order
- Section **Blood & Circulation** should be used if these symptoms are prominent during any of the stages of fever.
