Wooden Doors

At Jumbo Crafts Ltd, we locally hand craft a wide range of quality, durable wooden doors using locally available materials. While some of our doors are plain, others are decorated with main purpose being to enhance the aesthetic appeal of any interior space. Above all, our doors are made to fit any interior space, enhancing not just their beauty, but also enhancing security.

While making these doors, we do rely on our own designs. However, should a client come with their own designs, we are open and will make their product just as they desire.

Some of the wooden doors we make include: plain flush doors, Mahogany doors, door frames, decorated wooden doors, door partitions among others. In making these doors, we use either hard wood, soft wood or manufactured boards (plywood).

Feel free to call us if in need of a wooden door.
