

Have to, should and must – Exercise sheet (Pre-intermediate)

1. Read the short text about the teacher speaking to his students beneath and focus on the meaning of the underlined words. For each, try to find where the authority come from: inside or outside the speaker?

In high school, students always have to go to class. I am your teacher and I tell you what you must do to pass my course. You should revise as much as possible, but I know that you have other activities outside of school. You must do your homework, that is not an option. You have to be at school before 8.30 am, when the first lesson starts.

2. Write a short text explaining what are the obligations of adults compared to teenagers.
