

MANHEIM

# INTERNET 12 Enhancements Training

COX AUTOMOTIVE™

# INTERNET 02 Decommissioning

INTERNET 02 will be decommissioned from your AS400 box. Moving forward, all sale setup activities will only need to be completed in INTERNET 12.

After this change, all templates in INTERNET 02 will be retired with the menu. **Any sales setup in INTERNET 02 prior to the change will not be impacted.** We recommend to not setup any sales past your conversion date to ensure no issue with post-cutover data.

## M.Com Lane and Lane Description

After this deployment, INTERNET 12 will have two new fields:

**Pre-Sale Lane** – This is the lane which will display on M.com's Pre-Sale Inventory Page. This field will function just like the Actual Lane field in INTERNET 02.

**Pre-Sale Lane Description** – This is the lane description which will display on M.com's Pre-Sale Inventory Page. This field will function just like the Lane Description field in INTERNET 02.

*Note: Changing Pre-Sale Lane Description will update the Pre-Sale Lane Description of any other run ranges with the same Sale Date, Sale #, Computer Lane, and Pre-Sale Lane combination*

```

## Run Range Description

The Description field has been renamed to **Run Range Description**. This field functions the same way by setting the description of the run range on the Simulcast page in M.com. It has been renamed to differentiate from the Pre-Sale Lane Description.

# Deployment Action Items

## Pre-Deployment Action Items

To ensure a successful cutover deployment, the AS400 team needs your team's assistance before INTERNET 02 is decommissioned:

### 1. Delete any future sales setup in INTERNET 02 after your deployment date, as possible

- This will ensure there are no data issues after deployment.
- Take screenshots of lanes within the sales and then delete the sales in INTERNET 02.
- You can recreate these sales after deployment using INTERNET 12 (outlined on next slide).
- If you do not want to delete the sale in INTERNET 02, please be sure not to update the Pre-Sale Lane or Pre-Sale Lane Description in INTERNET 12 after deployment (outlined on next slide).

Location	Deployment Date	Point of Contact
Manheim Pensacola	Wednesday, November 6 <sup>th</sup>	Annie Phengsy
Manheim Daytona	Thursday, November 7 <sup>th</sup>	Annie Phengsy
Manheim Jacksonville	Friday, November 8 <sup>th</sup>	Annie Phengsy
Manheim Tampa	Friday, November 8 <sup>th</sup>	Annie Phengsy
Manheim St Pete	Friday, November 8 <sup>th</sup>	Annie Phengsy

## Post-Deployment Action Items

To ensure a successful cutover deployment, the AS400 team needs your team's assistance after INTERNET 02 has been decommissioned:

### 2. Update sales and templates in INTERNET 12 with Pre-Sale Lane and Pre-Sale Lane Description

- Enter Pre-Sale Lane and Pre-Sale Lane Description values for future sales and templates in INTERNET 12 according to the screenshots taken from INTERNET 02:
  - Pre-Sale Lane = Actual Lane you would have used in INTERNET 02**
  - Pre-Sale Lane Description = Sale Description you would have used in INTERNET 02**
- In case you did not delete all your future sales in INTERNET 02 before deployment, do not update the Pre-Sale Lane and Pre-Sale Lane Description value for those future sales.

### 3. Update Consignor Codes for sales and templates in INTERNET 12 (as needed)

- Update Consignor Codes in INTERNET 12 as needed to ensure the vehicles are broken out on M.com's Pre-Sale Inventory page as expected.
- In case you did not delete all your future sales in INTERNET 02 before deployment, the AS400 team will run a script to compare Consignor codes from INTERNET 02 and INTERNET 12 on future setup sales.
- Any discrepancies will be noted and provided to your team in case you want to update INTERNET 12.
