

# Simulcast Proxy Bidding

## Description

Proxy bidding is a feature where the computer bids in your absence. You enter the maximum price you're willing to pay, and the computer does the rest. It will only bid after there's a competing online or floor bid – it will not automatically bid your maximum price

## Benefits

- Never miss a vehicle again
- Close deals while the computer bids for you
- Simultaneously participate in multiple sales – actively bid in one sale while proxy bidding in others

## Description

1 Go to the Simulcast Pre-Sales lists and click on the number of vehicles link.

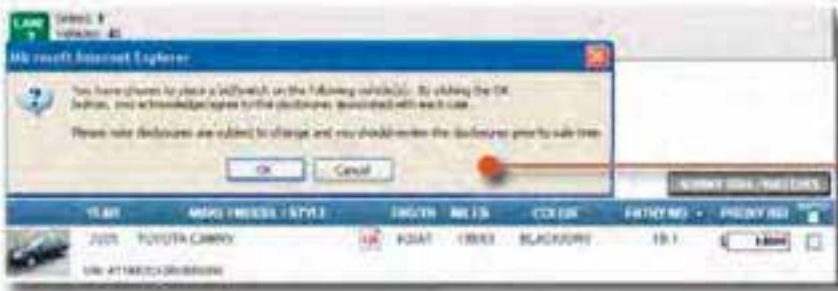

2 Enter your maximum bid, in increments of \$50, in the box under the **Proxy Bid** column for one or more vehicles; this will also add the vehicle to your Watchlist.

You can also just “watch” vehicle(s) by not entering an amount and checking the checkbox.

3 Click **Submit Bids/Watches** to submit your proxy bids.

A popup confirmation box will appear. Click **OK** if you accept the agreement.

If your bid amount(s) is not valid (e.g., another user has already submitted a proxy bid in the same amount, you will be prompted to correct your bid(s).

The buyer window will emit an audio alert three vehicles prior to yours crossing the block.

## SIMULCAST

[BIDDING SCHEDULE](#)

[help](#)

- 4 Proxy bids and Watchlist vehicles can be viewed, removed, or edited, provided the vehicle is not being auctioned ("on the block").

To do so, just click **Watch and Proxy List** at the top of the Simulcast pages.

To change a proxy bid price, change the price in the box and click **Submit Bids/Watches**.

To remove a proxy bid, remove the price from the box and click **Submit Bids/Watches**. Click **Remove All** to remove all proxy bids from your list.

If a vehicle is sold to an online buyer, an email purchase confirmation will be generated. If your proxy bid is outbid during the sale, you will also receive an email notification.
