NOVEMBER - 2018

SIGNAL	OPEN PRICE	DECISION	TAKE PROFIT	STOP LOSS	PROFIT/LOSS	PIPs COUNT	DATE
--------	------------	----------	-------------	-----------	-------------	------------	------

1. **Introduction:** The study aims to investigate the impact of the COVID-19 pandemic on the mental health of healthcare workers in the United States.

2. **Methods:** A cross-sectional survey was conducted among healthcare workers in the United States. The survey included questions about demographic information, work-related factors, and mental health outcomes.

3. **Results:** The study found that healthcare workers experienced significant increases in anxiety, depression, and stress during the COVID-19 pandemic. These findings were consistent across different healthcare settings and job roles.

4. **Conclusion:** The COVID-19 pandemic has had a profound impact on the mental health of healthcare workers. Further research is needed to explore the long-term effects and to develop interventions to support their mental well-being.
