### Technical Risk

1.The Client shall be responsible for the risks of financial losses caused by the failure of information, communication, electronic and other systems. The result of any system failure may be that his order is either not executed according to his instructions or it is not executed at all. The Company does not accept any liability in the case of such a failure.

2.While trading through the Client Terminal the Client shall be responsible for the risks of financial losses caused by:

- (a) Client's or Company's hardware or software failure, malfunction or misuse;
- (b) poor Internet connection either on the side of the Client or the Company or both, or interruptions or transmission blackouts or public electricity network failures or hacker attacks, overload of connection;
- (c) the wrong settings in the Client Terminal;
- (d) delayed Client Terminal updates;
- (e) the Client disregarding the applicable rules described in the Client Terminal user guide and in the Company's Website.

## Trade Copier Disclaimer

US RESIDENTS: Please email us at [info@fxsignals.com](mailto:info@fxsignals.com) if you live in the USA so that we can advise you of the best way to use our trading strategies so that there are no FIFO conflicts.

### Important notice:

Please run the Trade Copier software on only one chart at a time. Only one instance of the Client software should run at a time. Even if you have the same MT4 platform account running on multiple computers, do not allow the Trade Copier Client software to run on more than one computer at a time. Warning: Failure to follow this instruction can result in duplicate trades.

Trade Copier software glitches or malfunctions of the software or MT4 platform including Internet outages and/or broker variations that result in over-leveraging or increased position sizes are at the risk of each individual trader.

Trade Copier trades aim for only one take/profit Target. Prices may vary based on your broker due to slippage or other factors. Results may vary.

### DO NOT SET THE MAGICNUMBER TO ZERO IF YOU PLAN TO RUN ANY OTHER EA'S ON YOUR ACCOUNT.

International Forex Corp, Ltd. will not be held responsible for any losses incurred from duplicate trades, over-leveraged positions, or other glitches / malfunctions that may occur with the Trade Copier software system / MT4 platform either hosted or not hosted by International Forex Corp, Ltd.

It is the responsibility of the client to set and check his leverage, trade lot size and other risk management settings, etc.

### Alert Delivery:

The timestamp on SMS messages and email message is unfortunately not a feature controlled by us. The timestamp with the delivery time is set by the international carrier responsible for the delivery.

Most carriers will use GMT time for the timestamp, but they may also attempt to set the time zone for the destination country, or alternatively use their own local time.

### Alert/SMS/Text Message Fee's

Carrier charges may apply for receiving text messages on your mobile phone or email. Contact your wireless carrier for details about your plan. You are responsible for all alert/SMS/text message fees incurred from using any of the forex alert services. **But currently this service is unavailable!**

## Risk Warning

Trading foreign exchange on margin carries a high level of risk and may not be suitable for all investors. The high degree of leverage can work against you as well as for you. Before deciding to invest in foreign exchange you should carefully consider your investment objectives, level of experience, and risk appetite. The possibility exists that you could sustain a loss of some or all your initial investment and therefore you should not invest money that you cannot afford to lose. You should be aware of all the risks associated with foreign exchange trading and seek advice from an independent financial advisor if you have any doubts. Past performance posted by Signal and Systems Providers ("Providers"), is not necessarily indicative of future results. No representation is made that any account is likely to achieve profits or losses like those shown. In fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any trading program. The composite monthly results are primarily hypothetical results of the master demo and its representation of the Providers, though performance results displayed may represent a combination of live and hypothetical results and are not exclusive to either. There are numerous other factors related to markets in general or to the implementation of any specific trading program that cannot be fully accounted for in the preparation of hypothetical performance results and all of which can adversely affect actual trading results. If specific trades were simultaneously executed in hypothetical and live, real-time trading, the lesser of the two results will be displayed. There is no guarantee that one applying these methodologies would have the same results as the hypothetically posted. Since trading successfully depends on many elements including but not limited to a trading methodology and a trader's own psychology, the web site does not make any representation whatsoever that the above mentioned trading systems might be or are suitable or that they would be profitable for you. Please realize the risk with any investment and consult investment professionals before proceeding. The trading systems herein described have been developed for sophisticated traders who fully understand the nature and the scope of the risks that are associated with trading. Should you decide to trade any or all these systems' signals, it is your decision. Currency trading involves high risk and you can lose a lot of money. By using the forex signal service, you agree to the terms herein. It is essential that a Demo simulator account is first used THOROUGHLY before commencing with a Live Online Forex account. The trade signal system is strictly for the use by traders with EXCESS RISK CAPITAL and who are fully aware of the inherent risks involved in Forex trading. The high degree of volatility within the foreign exchange market, and the ability to leverage your position means that losses can be quick and significant. **You may lose your entire investment capital. It is your responsibility to ensure that you fully understand these conditions before proceeding further.**

By using the Forex Signal program and software, the user agrees that the author and any other entities associated with the system and or International Forex Corp, Ltd. shall not be held liable for any direct, indirect, consequential loss or any damages whatsoever arising from this usage, or the use of any information, signals, software, messages, manual, worksheet, instructions, alerts, directives etc. and any other information contained in regard to its use and understanding. Neither Guarantee of performance, results nor any anticipated Return on investment is offered at any time. Past performance is no Guarantee of future results. By using the forex signal system program, the user agrees to indemnify and holds harmless International Forex Corp, Ltd. and its employees, associated companies or service providers from any losses, damages or otherwise arising from using its use. And further agree that:

**There is always a relationship between high reward and high risk. Any type of market or trade speculation that can yield an unusually high return on investment is subject to unusually high risk. Only surplus funds should be placed at risk and anyone who does not have such funds should not participate in trading foreign currencies.**

It should also be understood that hypothetical performance results may be posted on the website or given to third parties by other methods. Such hypothetical performance results have inherent limitations in that they have been prepared with the use of past performance and past performance is no guarantee of future results. Performance can and does vary between individuals
