

IRAN UNIVERSITY OF SCIENCE & TECHNOLOGY

School of Civil Engineering

This is certify that Reza Azarmanesh had participated to the collaborative project between Iran University of Science and Technology (IUST) and Department of Environment Islamic Republic of Iran, entitled 'Preparation of emissions inventory and evaluation of major air pollution reduction scenarios in Arak'.

This project begin in September 2018 and lasted for 13 months until the final defense of the project. During the time he served as an expert and accepted responsibilities like collecting data, preparing reports and PowerPoints, presentations, some financial\administrational and coordination duties. I confirm that he has been an effective team member with his dedication, perseverance and commitment to participate in this research project and I wish all the best for his future.

Based on his performance during the project time period and his strong enthusiasm towards learning new things and completing assigned tasks, I strongly recommend his for any type of research program and projects without hesitation.

Please do not hesitate to ask me for more information.

Hossein Ghiasinejad
Ghiasi
The head of research team
