

THINK AND ACT,
IT'S TIME.

WALK FOR A BETTER WORLD

PURPOSE:

Our goal is to reduce garbage, clean the rivers, and the streets of Tejupilco.

We hope to educate people not to litter.

As a last alternative; we hope that the government imposes fines on those who do not respect and leave the garbage outside their homes and in the rivers

FACTS:

- In our country 84,200 tons of solid waste are produced per day.
- Almost half of the solid waste produced in Mexico 45% leaves our homes, and we recycle less than 13%. Time to change that, right?
- Each ton of recycled paper avoids the emission of 900 kilos of CO2 into the atmosphere and helps us save more than 20,000 liters of water.

ACTIVITIES:

- We will go out to collect garbage. We are going to reuse bags to put the garbage.
- We will build trash cans with collected plastic bottles to reuse and recycle garbage.
- We will ask for help with a petition letter to the president, this for him to buy more trash cans.

- We will have meetings with the neighbors about the impact soil contamination.
- We will reuse wood to places signs on the corners or some streets in Tejupilco.
