Government official

To whom it May concern

Tejupilco, Mexico

Dear person, we send our regards, the reason for our letter is because in our community there is a problem of noise pollution, this problem has been around since earlier times and that causes damage to our health and animals. It's causes by all the noises around us.

This problem arises from the excessive number of vehicles and noisy objects that exist today. For example: the constructions, vehicles, telephones, music, voice, animals and everything that generates noise. Besides, this problem causes ear problems, lack of sleep, lack of concentration, headache, anxiety and depression. Previously, this problem wasn't so common because there weren't many buildings, vehicles or things that generated a lot of noise, but today it's already quite common.

It's important that you provide a solution to reduce the problem. So, what we need to do? What solutions do you suggest? Therefore, we need to carry out activities without generating excessive noise, avoid using car and opt for alternatives such as bicycles, doing household chores at recommended times and protect some areas that are exposed to noise.

We hope you take into account our proposals mentioned

We appreciate your attention
