

BURNING AN IMAGE FILE ON A CD/DVD USING POWERISO

PowerISO includes a built-in CD / DVD burning engine. You can use PowerISO as an image burner. It can not only burn iso images, but also burn other popular disc image files. You do not need install any other burning software.

STEPS

1. Start PowerISO and open the image file.
2. Click "Burn" button on toolbar, the "Burn" dialog will pop up.
3. Choose the burning drive which holds the disc you want to burn.
4. Choose the burning speed. The default burning speed is the maximum speed supported by the drive and the media.
5. Check the option "Verify written data" to verify the data after burning.
6. Click "Burn" button to start burning the image file.
