and  
Financial Technologies

Tashkent – 2023

Professional competence is a great asset for the individual! Like our great ancestors, let's cherish every moment, diligently acquire knowledge, and give all our strength for the benefit of world civilization, the development of the Motherland, and the well-being of society!

## Rektor's Message

---

### DEAR FRIENDS AND STUDENTS!

Today we live in a world where scientists and people working in the field of education receive more and more support from society, and intellectual assets are valued and recognized above material ones. In all areas, the most respected and highly responsible positions in the public sector are entrusted to young and creative people who are socially and politically active and who put other people's interests above their own. "We will definitely build a new Uzbekistan together with our youth!" said President Shavkat Mirziyoyev, placing great confidence in the youth. At such a time, it is a matter of honor and great responsibility for all of you to acquire knowledge, show initiative and diligence, raise the prestige of our country in the international arena, and actively participate in the development of the country.

Professor  
**Sh. Mustafakulov**  
University Rector

## WHY US ?

International Nordic University is the only private university in Central Asia that offers higher education in the style of the Nordic countries, especially Finnish.

The university is rightfully the cornerstone of Finnish-Uzbek cooperation in the field of education, the first educational cluster of the Finnish higher education system in Uzbekistan.

The university aims to accelerate the integration of higher education, science, and production by training full-time and part-time highly qualified specialists in the field of modern education in the republic.

# FINANCE AND FINANCIAL TECHNOLOGIES

## OVERVIEW

Do you aspire to a management position in finance and want to bring your management skills up to top international level?

Finance is the highest academic management qualification on the global education market. With our specialised Finance study programme, you'll gain sound business administration know-how, key leadership skills and comprehensive specialist knowledge of international finance. Once you graduate, you'll have your pick of attractive leading roles in finance.

# FINANCE AND FINANCIAL TECHNOLOGIES

## WHAT WILL YOU LEARN?

Graduates with a finance background are in high demand. This Accounting and Financial Management degree course will prepare you for a career in areas such as accountancy, auditing, tax advisory, wealth management, banking, business development and organizational leadership.

As a future accounting and finance professional, you will understand the legal, ethical and efficient practices which are critical to the role.

Studying a range of core and advanced accountancy and finance modules, you will gain skills in analyzing, planning and decision-making. As well as gaining the knowledge to provide financial advice to public, private and third sector organizations.

### This course will enable you to:

1. Explore the challenges of operating in a contemporary business environment and how new digital technologies are driving change
2. Develop advanced skills in key areas such as management accounting and financial reporting – getting to grips with contemporary accounting information systems,
3. Understand the importance and process of audit and assurance within an organization and the regulatory framework governing practitioners,
4. Get to grips with the complexities of taxation and the implications of inaccurate calculations,
5. Explore the legal environment within finance, financial crimes and the growing area of cybercrime.
6. Analyze the two dimensions of finance and sustainability.

## HOW WILL YOU LEARN IT?

You will gain a solid foundation for your chosen career path, with a strong focus on providing practically applicable skills that employers within the industry need and value.

With both academic and practical experience, you will be prepared to unlock your future career aspirations.

Your theoretical understanding will be enhanced by opportunities to learn, develop and demonstrate a wide range of practical and applied skills and competencies.

## COURSE OVERVIEW

Our Finance study program is highly practice-oriented and will provide you with all the business administration and specialist knowledge you'll need as a future manager in finance and accounting.

Among other things, you'll learn about the factors that influence financial decisions at the management level, which financing options are available in international capital markets and how to implement large finance projects successfully.

In addition, you'll familiarise yourself with international accounting standards and gain detailed knowledge on the topics of investment analysis and portfolio management. Once you graduate, you'll have the skills to optimize corporate financial performance in a sustainable manner.

# CAREERS:

## FINANCE CAREER OUTLOOK

Having completed Finance, you'll be a sought-after finance expert on the international market. Once you've completed your degree, you could work as...

As a risk manager, your job is to analyze business decisions with regard to their risks for the company. At a bank, for example, this means assessing the credit default risk before a lending decision is made. In the case of takeovers or mergers, you check whether they will actually result in the desired potential. And if a new product is to be launched on the market, you are responsible for a detailed competitive analysis. Your goal is always to identify and analyze potential risks and develop scenarios to minimize risks.

As a financial controller, your job is to measure the profitability of a company using key performance indicators. You uncover weaknesses, risks, and potential for improvement in the company and develop efficient solution concepts - often in cooperation with the specialist departments. If these concepts are implemented, you are responsible for the central recording and evaluation of the implementation progress and success and, if necessary, initiate adjustment measures.

Compliance officers have a controlling and supervisory function in companies. Your goal is to develop an organizational structure in which all employees can comply with legal regulations. You regularly inform employees about legal regulations and internal guidelines and initiate training in this area. You introduce adequate control mechanisms so that violations of regulations can be identified.

### RISK MANAGER

### FINANCIAL CONTROLLER

### COMPLIANCE OFFICER

**ALL OUR STUDY PROGRAMMES INCLUDE THE FOLLOWING BENEFITS**

1. Teaching and study material
2. Marking of your end-of-module exams
3. Online tutorials and guidance from tutors
4. Career coaching
5. Learn English
6. Foundation year
7. Work and travel
8. Exchange program
9. Travel across Uzbekistan

Learn and develop financial knowledge and skills to work as a value-based manager, and communicate with finance and accounting specialists at board level.

**Where there's a will, there's a way.**
