# MODERN DIRECTIONS IN TRAINING

at Nordic International University

## EDUCATIONAL OFFER

Primary Education

Tashkent – 2023

Professional competence is a great asset for the individual! Like our great ancestors, let's cherish every moment, diligently acquire knowledge, and give all our strength for the benefit of world civilization, the development of the Motherland, and the well-being of society!

## Rektor's Message

---

### DEAR FRIENDS AND STUDENTS!

Today we live in a world where scientists and people working in the field of education receive more and more support from society, and intellectual assets are valued and recognized above material ones. In all areas, the most respected and highly responsible positions in the public sector are entrusted to young and creative people who are socially and politically active and who put other people's interests above their own. "We will definitely build a new Uzbekistan together with our youth!" said President Shavkat Mirziyoyev, placing great confidence in the youth. At such a time, it is a matter of honor and great responsibility for all of you to acquire knowledge, show initiative and diligence, raise the prestige of our country in the international arena, and actively participate in the development of the country.

Professor  
**Sh. Mustafakulov**  
University Rector

## WHY US ?

International Nordic University is the only private university in Central Asia that offers higher education in the style of the Nordic countries, especially Finnish.

The university is rightfully the cornerstone of Finnish-Uzbek cooperation in the field of education, the first educational cluster of the Finnish higher education system in Uzbekistan.

The university aims to accelerate the integration of higher education, science, and production by training full-time and part-time highly qualified specialists in the field of modern education in the republic.

Based on best practices, innovative educational models, curricula, and programs created in the prestigious higher education institutions of Northern Europe, the university will contribute to the preparation of highly qualified specialists, taking into account the needs of the real sector of the economy.

Created in Tashkent on the basis of the direct support of the Karelian University of Applied Sciences of Finland, the Helsingin School Suomalainen Yhteistkoulu, the Nokia Transnational Corporation, the Finnish Water Forum Association, and the ISKU Company, the university will provide services based on the advanced achievements of Finland in the field of education.

## THEORY AND METHODOLOGY OF EDUCATION AND TRAINING (IN PRIMARY EDUCATION)

### Course Overview:

The Theory and Methodology of Education and Training in Primary Education course is a four-semester program designed to provide students with a comprehensive understanding of the underlying principles, theories, and practices that inform education and training in primary education. The course will explore the latest research and innovations in the field of primary education and equip students with the knowledge and skills required to become effective and reflective practitioners.

## THEORY AND METHODOLOGY OF EDUCATION AND TRAINING (in Primary Education)

### Course Objectives:

- To provide students with a deep understanding of the theoretical and practical aspects of primary education.
- To equip students with the skills and knowledge required to become effective and reflective practitioners in primary education.
- To expose students to the latest research and innovations in the field of primary education.
- To prepare students to meet the challenges of an ever-evolving field and to contribute to the development of a more equitable and inclusive society.
- Course Structure:
- The course will be delivered over four semesters, with each semester building on the knowledge and skills developed in the previous semester.

**Semester 1:**

The first semester will focus on developing the language and pedagogical skills necessary to facilitate communication in diverse educational contexts.

**Semester 2:**

The second semester will provide an overview of the theoretical and practical aspects of primary education, including the history and philosophy of education, child development, and learning theories.

**Semester 3:**

The third semester will focus on the practical aspects of primary education, including curriculum design and development, assessment and evaluation, and instructional design.

**Semester 4:**

The fourth and final semester will be dedicated to students completing their final project, which will enable them to demonstrate their mastery of the concepts and skills learned throughout the course.

**Teaching and Learning Methods:**

The course will use a range of modern and innovative teaching methods to enhance learning, including interactive lectures, group discussions, case studies, and practical exercises. The course will also make use of digital tools for collaboration and communication to facilitate learning in different languages.

**Internship Opportunities:**

Students will have the opportunity to participate in internships in Northern European countries to gain practical experience in primary education.

**Strategic Cooperation:**

The program has a strategic cooperation with Karelia Applied and Science University, which offers students the opportunity to participate in 1+1 degree programs.

**Work and Travel Program:**

Students will have the opportunity to participate in a work and travel program to gain practical experience in primary education while also exploring different cultures and lifestyles.

### Career Opportunities:

Graduates of the Theory and Methodology of Education and Training in Primary Education course will be well-prepared to pursue a variety of career paths in primary education. They may choose to become teachers or educators in public or private primary schools, or to work in non-profit organizations or governmental agencies that promote education and child development. Graduates may also choose to pursue further education and research in the field of primary education. There is a high demand for qualified primary educators in Central Asia, Nordic and other European countries, and graduates of this course will be well-positioned to pursue rewarding careers in this field.

### Conclusion:

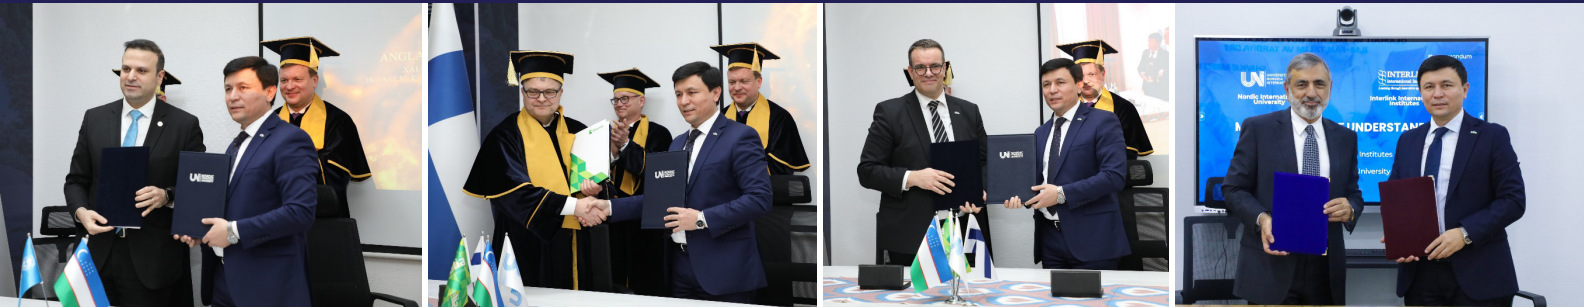

Upon completion of the course, students will be well-prepared to meet the challenges of an ever-evolving field. They will be equipped with the knowledge, skills, and practical experience necessary to make a positive impact in the lives of children and young people, and to contribute to the development of a more equitable and inclusive society.
