Recall / Safety Report	RECALLS REPORTED AT SAFETY COMMITTEE MEETING				
Month Reporting	JULY 2020				
Reported On:	<a href="#">Click here to enter a date.</a>				
Reported By:	Giovanna Conti - Robles				
Description of Equipment / Product Recalled	Date Posted	Manufacture	Class	Type of Action	Date Status Updated
NRAC ID: 143247  FDA ID: D-1376-2020  Product 1: Zilretta (triamcinolone acetonide extended-release injectable suspension), 32mg per vial, 5mL vials, Single-dose Kits, Rx Only NDC: <ul style="list-style-type: none"> <li>70801-003-01</li> </ul> Lot Number: <ul style="list-style-type: none"> <li>ZA19014</li> </ul> Expiration Date: 5/31/2021	7/10/2020	Flexion Therapeutics, Inc, Burlington, MA	Class 2	Type of Action: Update to Prior Notice  Reason: This is an update to recall number D-1376-2020 posted on 7/8/20 to include nationwide distribution. Temperature Abuse: Product was stored at room temperature longer than six weeks and was inadvertently distributed instead of discarded.  Action: Quarantine and contact your supplier for instructions	7/13/2020  10:53 AM Christine Matusiak Quarantined  Have product (recall)

Recall / Safety Report	RECALLS REPORTED AT SAFETY COMMITTEE MEETING				
Month Reporting	AUGUST 2020				
Reported On:	<a href="#">Click here to enter a date.</a>				
Reported By:	Giovanna Conti - Robles				
Description of Equipment / Product Recalled	Date Posted	Manufacture	Class	Type of Action	Date Status Updated
NRAC ID: 143356  FDA ID: To be determined  Product 1: Imager II Angiographic Catheter - 5 French Curved Tip Shapes  Assorted part and lot # listed on NRAC site	8/6/2020	Boston Scientific Corp, Marlborough, MA	Class TBD	Type of Action: Update to Prior Notice (142601)  Reason: This is an update to recall number Z-1555-2020 posted on 2/18/2020 to include all lots/batches of this 5F configuration. Boston Scientific has identified an increase in the rate of tip detachment complaints.  Action: Quarantine and return affected product for credit. Consider both the inner and outer packaging UPN codes when searching for affected product, as the UPN numbers on the inner and outer labeling are different. With questions contact your local sales representative	8/7/2020 7:39 AM Anne Marie Driscoll Once a Month In Progress  8/12/2020 12:57 PM Anne Marie Driscoll Have affected product. Removed from shelf and quarantined. Sent to materials ops for return. -ad

NRAC ID: 143441  FDA ID: Z-2872-2020  Product 1: C-Arm Fluoroscopic X-ray System  Model Number: <ul style="list-style-type: none"> <li>• OEC 9800</li> <li>• OEC 9900 Elite</li> </ul>	8/28/2020	GE Healthcare, Salt Lake City, UT	Class 2	Type of Action: Defective Product Recall  Reason: GEHC Surgery became aware that some users of the 9800 and 9900 fluoroscopic mobile C-Arms within the United States had requested that a Field Service Engineer (FSE) change the dose value on the live update screen from AKR/CAK to DAP. All systems sold to customers in the US that leave GEHC Surgery (the place of manufacture) are configured to display AKR/CAK when they leave the factory. An FSE changing the dose display, per the customer request, to display DAP instead does not comply to 21CFR 1020.32(k), which requires fluoroscopic equipment manufactured on or after June 10, 2006 to display continuous updates of AKR and CAK values.  Action: With questions call Troy Perry at 801-536-4890.	9/3/2020  12:53 PM Janet Pierce  Completed  systems are up to date
--	-----------	-----------------------------------	---------	--	---

- There are currently **194 recalls** that have to be addressed.
- General rule is to respond to the recalls the day it was received or within 1-2 days.
- If you need time to review the recall and your supplies you can update the status to “in progress” and that will stop the clock.
- NRAC will remind you via email to review.
- **Class 1 recalls** are to be responded to within 1 day since there is a reasonable probability that the use the affected product may cause serious injury or death.

**Subject: Upcoming Packaging Changes to Select Arrow® Brand Kits**

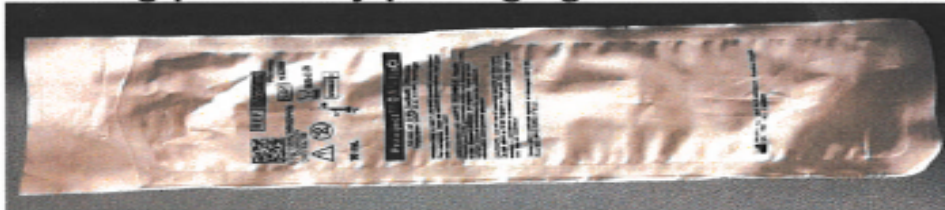

Dear Valued Customer,

In our ongoing commitment to maximize the clinical benefits of our products we are implementing packaging changes to the pre-filled saline syringes included with the Arrow® Brand Kits your institution currently purchases.

Beginning in September, the pre-filled saline syringes currently affixed to the external primary kit packaging will be moved inside the primary packaging, within the sterile barrier wrap of the procedural tray.

Additionally, sealed foiled pouches will replace the existing peel-away packaging of each pre-filled saline syringe, facilitating procedural efficiency through a clinician focused, easy open design.

Existing peel-away packaging:

New sealed foiled pouch:

**Affected SKUs include select:** (See Appendix A)

- Arrow® PICC Kits
- Arrow® Midline Kits
- Arrow® JACC Kits
- Arrow® Central Venous Catheterization Kits
- Arrow® Acute Hemodialysis Kits
- Arrow® Percutaneous Sheath Introducer Kits
- Arrow® Multilumen Catheter (MAC) Kits

## The Communicator™ Clear Window Surgical Mask (Box of 40)

★★★★★ (7 customer reviews)

\$60.00

**Model FM86000 |Box of 40 Masks**

**LIMITED QUANTITY | SHIPPING MID-SEPTEMBER**

Patented, FDA registered device meets ASTM Level 1 surgical mask standards with the added benefit of a fog-resistant clear window for improved communication.

Supported by Doctors, Nurses, Dentists, Hygienists, Orthodontists, Interpreters, and other Health Professionals seeking easier communication and exceptional protection.

### Product Features

- ASTM F2100 Level 1 Protection. >95% bacterial and particle filtration efficiency.
- Comfortable material with elastic earloops and adjustable nosepiece design.
- Not made with latex.
- Easy dispenser box containing 40 single-use, disposable masks.
- Made in the USA for guaranteed highest quality.
- Available exclusively from Safe'N'Clear, Inc.

---------	--	------------------------

The only difference between the two products is the manifold. The 22703 has a double swivel elbow manifold and the 2270135 has a T piece manifold and separate swivel which attaches to the patient port. It also comes with a flex tube to allow an easy connection to the vent tubing. Other than this, they work exactly the same

**Nurse/Technologist Instructions:**

1. After specimen is collected – remove plastic label from container by tearing along perforations.
2. Label container – place in appropriate specimen transport bag and forward to the lab.

**If Tube Only is to be Forwarded to Lab:**

1. After specimen is collected – remove plastic label from container by tearing along perforations.
2. Unscrew funnel section from the container.
3. Remove centrifuge tube and close tightly using the cap provided. Remove white cap and dispose of funnel in the appropriate manner.
4. Label centrifuge tube – place into the container and replace white cap.
5. Forward to the lab.

**Patient Instructions:**

- A. For collection, do not remove outer plastic label. Unscrew white cap and expectorate into funnel.
- B. After specimen is collected, replace white cap by screwing tightly on container.
