## NORTHWELL-PHELPS IMMERSION IN CLINICAL EMPATHY & REFLECTION

This study explores the perspective of our patients through the experience of spending a night in the hospital, in order to enhance humanistic care and empathic connection. The experience incorporates several key elements of a typical overnight adult inpatient stay. As part of the study, you will be asked to complete a brief series of anonymous questionnaires about your experience.

Phelps-Northwell Family Medicine Residency Program faculty physicians, hospitalists, staff nurses, and post-graduate trainees are currently eligible for participation on a volunteer basis.
