Response Counts

Answer counts can vary among questions. This happens because:

A question's text was edited,

An answer's text was edited,

The correct answer selection was changed,

An answer choice was added to or removed from a question.

Question Group: Default Group

1. 1 (Multiple Choice)

In what specialty do you work? - MANDATORY QUESTION

	RESPONSES	% OF STUDENTS
	0	0.00%
1. Behavioral / Mental Health	2	12.50%
2. Cancer Program	0	0.00%
3. Cardiology - NWPP	2	12.50%
4. Croton - NWPP	1	6.25%

Question Group: Default Group

16. 16(Free Text)

PLEASE ADD COMMENTS BELOW

1. N/A
2. With the current COVID pandemic, I think everyone felt out of their element when volunteering to help in a different department. The institution helped prepare us the best way that it can so we can to handle the crisis.
3. No
4. Supporting a clinical nurse: Surgeon rounded on patient who only speaks Spanish. Surgeon did not wait for nurse to get VRI or various translation services. Walked off unit-after stating that "I'll get consent from the son." Patient is competent and in their 60's. Is able to understand. Nurse was very upset and felt dis-respected. She called/contacted surgeon again that she will get VRI and translation all set up for him. Surgeon declined. "I'll get it in ASU. Send the patient up." This occurred the week after Magnet. What kind of Magnet example is this? What can I say to the nurse? There are some things we have to let go? To choose our battles? Nurse sent patient to ASU without consent. Telephone consent was obtained by ASU and Son. This is a real life situation.
5. n/a
6. N/A
7. would like to learn mechanical debridement techniques
8. Cannot think of one at this time
9. Probably in areas of mental health where I have not had as much experience; for example, active substance use (usu refer to subs use program or detox if needed as I do not have the suboxone waiver), eating disorders especially anorexia and bulimia (these have high risk medical components, usually refer out (to medical) of outpatient psychiatry if BMI < normal), patients with Borderline Personality Disorder (BPD) significantly improve with DBT as part of their treatment (it is the Gold Standard for BPD) and I am not DBT trained. Where I previously worked, I would refer to a therapist who had DBT training or refer to DBT class, but there are no DBT trained clinicians at PCS outpatient, nor is there a DBT program for patients. Literature states that at least 50% of patients with MDD and/or anxiety in outpatient clinics have BPD. Thank you.
10. N/A
11. none
12. N/A
13. Enhancing pain protocols, management for complex drug dependent patients
14. presenting

15. Just finishing CITI program. Have not engaged in research since my Masters Degree. Would benefit greatly from any education in this area.

16. Cardiology pts
