

Meeting Name	Pressure Injury Resource (PIR) Team		Council/Meeting Minutes	Please check off all components and indicators that relate to each topic being discussed.	
Location	MSB 235				
Date	2-9-2021				
Time	16:00-17:00				
Conducted By	Deborah Reynolds				
Topic/ Facilitator	Discussion	Staff Input & Feedback	Action	Magnet Components	Strategic Plan Indicator
Amanda Dayton, BSN, Sandee Sy, BSN	1.Shining the Light Northwell Wound Conference Update. The Hot topic was COVID and prone positioning. November 2020. a) Takes 3-4 people to prone an intubated patient b) Pad bony prominence of the patients’ anterior side (especially the face) with silicone foams. Placing on pressure redistribution surface. Utilizing cushions about 6x8 inches, used for neonatal. Made of gel like substance.	What is a Concord position? Head is positioned to the left and is placed above the heart. Cervical collar for high-risk patients with potential spinal issues. We have had problems with facial pressure injuries from prone positioning (chin, ears, cheeks). We use the neonatal gel pillows. Have not had success with the foam proning pillows. Question: How many hours do you repositioning the head? Recommended Q2 hours. Respiratory tx must be present during repositioning for accidental extubation.	Debi will forward information about upcoming Northwell conference when available.	<input type="checkbox"/> Transformational Leadership <input type="checkbox"/> Structural Empowerment <input type="checkbox"/> Exemplary Professional Practice <input checked="" type="checkbox"/> New Knowledge, Innovations and Improvements	<input type="checkbox"/> People <input checked="" type="checkbox"/> Patient Experience <input checked="" type="checkbox"/> Quality <input type="checkbox"/> Financial Performance <input type="checkbox"/> Operations

		Amanda said the conference was good and would recommend it.			
Deborah Reynolds, BSN, RN, CWOCN	New members of Skin Team a) Donna Aiken 5S b) Benje Sumagne- from Wound Healing Institute c) Co-Chair -Roxanna McKenna Product sign up sheet. Please sign up		Roxanna will be doing the Meeting minutes for todays meeting. Thank you, Roxanna.	<input type="checkbox"/> Transformational Leadership <input checked="" type="checkbox"/> Structural Empowerment <input type="checkbox"/> Exemplary Professional Practice <input type="checkbox"/> New Knowledge, Innovations and Improvements	<input checked="" type="checkbox"/> People <input type="checkbox"/> Patient Experience <input type="checkbox"/> Quality <input type="checkbox"/> Financial Performance <input type="checkbox"/> Operations
Angela Sniffen, RN, MPA, CCDS, CCS Manager, CDI Department	Presentation – see Power Point a) Clinical Documentation Improvement Department. b) What happens when a patient is admitted with a PI? Nursing documentation is used to identify wounds and contribute to provider documentation. Staging of ulcer can come from the nurses' notes. c) Present on Admission Indicator: PI, DVT, PE d) What happens when patient acquires a new PI?	Nursing has 24 hours to capture pressure injuries and document on them. Providers have no time limit to decide if a pressure injury was present on admission. Donna Aiken asked about how to stage PIs on a new admission when Skin Champions and WOC nurses are not around to assist and the nurse is unclear about what to stage a wound. Angela stated that it is important to document that the	Skin Champions to relay the value of nurse charting back to their units. Thank you to Angela for a very informative presentation. Debi spoke about hospital acquired pressure injuries that develop from TED stockings and attempts to have them removed from provider order sets. Reminder that TED stockings may help prevent DVT that lead to PE's. Debi will have this Power point posted on the nursing website. Remind your units to review it.	<input type="checkbox"/> Transformational Leadership <input type="checkbox"/> Structural Empowerment <input checked="" type="checkbox"/> Exemplary Professional Practice <input type="checkbox"/> New Knowledge, Innovations and Improvements	<input type="checkbox"/> People <input checked="" type="checkbox"/> Patient Experience <input checked="" type="checkbox"/> Quality <input type="checkbox"/> Financial Performance <input type="checkbox"/> Operations

		<p>wound is there most importantly. Debi states that staging can be difficult. Angela encouraged us to the best we can with staging.</p> <p>Carol extended thank you to Angela for a really informative presentation.</p>			
Deborah Reynolds, BSN, RN, CWOCN	<p>Next meeting 3-9-21:</p> <ul style="list-style-type: none"> a. Review of Stage 2 PI's b. Review of February's prevalence data c. Check out nursing website <p>Journal club</p> <ul style="list-style-type: none"> 1. Article 24 2. Laying OR patients on bed alternating bed overlay 3. OR's using bed overlays 				

Respectfully Submitted,

Roxanna McKenna
