

This is the link to watch free movies to replace IndoXXI and LK21

In Indonesia itself, there are many legal movie viewing sites that you can watch. People naturally have to leave illegal movie watching sites like INDOFLIX21 and FILM21KU. Watching from these illegal sites will get you a lot of losses, ranging from being infected with malware to becoming a victim of credential data theft. These illegal sites do not pay licenses to content owners and provide access to free content for free to those who access. Of course, maintaining a content server requires substantial funds and providers who can rely on advertising to finance operations.

It's also a problem because the content that advertises is not accepted on other platforms. For example, gambling and pornographic content. There are also ads that point to malicious content such as installing malware or scam and phishing sites.

Watching illegally will also harm filmmakers. This is because the activity violates copyright. Filmmakers also do not get any income, while creating a work requires a lot of money.

FREE online movie streaming you can use:
